Student Learning Outcomes

Students completing a major in Public Health: Health promotion will be able to:

- Assess individual and community needs, assets and capacity for health promotion and education
- Collaborate with other professionals, staff, communities and consumers in the planning, implementation, and evaluation of health promotion and education programs.
- Conduct research and apply findings into practice settings.
- Administer and manage public health programs.
- Examine health disparities and design programs in health promotion after considering population characteristics.
- Examine public health through various lenses including environmental, local, national, and global.
- Communicate and advocate for health promotion and education.
- Encourage and promote public health within the framework of legal, ethical, moral and professional standards.
- Provide leadership within the public health profession.
- Successfully participate in the professional certification examination process (optional).

Oregon Preliminary Teaching Licensure in Health Education or Physical Education

A student majoring in Public Health: Health Promotion or Human Performance – Physical Education must also complete a Secondary Education major with Licensure. In order to complete the Secondary Education major with Licensure, students should begin taking education courses no later than their sophomore year. The student must be advised by faculty in both majors.
