

CATALERT EMERGENCY NOTIFICATION

CatAlert is an emergency notification system that notifies faculty, staff, students and others of critical information and situations affecting campus through the use of text messages, voice messages to multiple phone numbers, email, and more. This system makes immediate notifications across campus without delay.

Current students, faculty and staff are automatically enrolled for CatAlert voice and email messages. To receive text messages, students, faculty and staff will need to “opt-in” for text messaging. CatAlert is the primary means of emergency communication with the Linfield Community.

Wildcat Guardian is recommended to our Linfield community members. By downloading the Rave Guardian app by Rave Mobile Safety, it allows members to quickly call 911, LPS, and other campus resources. They can also use it to share live locations with trusted members of the app and set timed notifications.

For more information on CatAlert and Wildcat Guardian visit <https://www.linfield.edu/linfield-public-safety/catalert.html>
